SKILLS

- ❖ React JS
- ❖ Tailwind
- ❖ HTML, CSS and JavaScript
- ❖ PHP / Laravel
- ❖ Basic of C and Java

EDUCATION

- ❖ BCA | V.S. International College 4th semester | (2021 - Current)
- ❖ XII (NEB) | Aishwarya Vidya Niketan (Computer Science) | 2020

EXPERIENCE

- ❖ Intern | Bibhuti Solutions (June, 2023 – Nov, 2023)
Web Development - Laravel

ACADEMIC PROJECTS

- ❖ **Full Stack College Management System**
Developed a comprehensive College Management System using the MERN stack. Features include student and teacher data management, event scheduling, notice and complaints management, and routine management. Utilized Redux Toolkit for state management. Designed a user-friendly interface with responsive design. Integrated a custom landing page for cohesive branding and seamless user experience. Applied modern design principles for optimal viewing across devices.
- ❖ **Movie Land**
Movie Land is a project where I utilized React to create an impressive user interface for displaying lists of movies obtained through an API. The project focuses on providing a visually appealing and user-friendly experience for users to explore and discover new movies.
- ❖ **Weather Application**
I developed a weather application using React, integrating an API and API key to retrieve and display the current weather conditions for any location on Earth. The app features a smooth and responsive design, providing users with an intuitive and visually appealing experience for checking the weather.
- ❖ **Responsive UI Clones**
I also completed UI clones of popular websites including Amazon, Netflix, and Twitter, focusing on responsive design to ensure optimal viewing across devices. These projects demonstrate my ability to recreate complex interfaces and implement modern design principles.
